Today's 200922 AVH & VH Dialog Topics -DE-ID's 200922 1609

JD & "L" et al - they are torturing me during all waking times since I got up this morning.

The nature of the torture was

- mental interference, (thought insertions, that caused confusion and distraction),
 - AVH and VH topic distractions (they kept changing topics / questions),
 - somata and tactile interference (they kept putting hairs on my hand whilst masturbating, and causing abrasions, and bleeding, of my penis) , computer hacking (they returned my stolen passwords, changed TABS and pages as I was trying to work, invalidated new account registrations, changed words and punctuation while they distracted me),
 - walk by's (out on the path past my TV room balcony),
 - asking the same question, or few questions, repeatedly, over and over and over, varying time intervals, and ensuring interruptions to my concentration)
 - they claimed "jess" was visiting the USA to make pornographic video's. She occasionally joined in torturing me
 - superseded / over-ride / subjugated my freewill (I can't figure how; seems impossible but true : ask "jess"
 - kept obstructing and jerking and jolting my arms and fingers (not a delusion, I have empirical proof)
 - apparently changed the date from the original date that I was changing, of the last deadline for our fight, our physical confrontation to "spill some blood - out in the car park", now finalised to 16/10/22
- And more...
